

OFFICE ELECTRONICS RECYCLING BOX

SECURELY AND EASILY DISPOSE OF YOUR OLD OFFICE HARDWARE

You know that closet, cubicle, or old office you're using to house all your retired computer hardware? That's valuable space you could put to much better use.

We get it though. Where others see old computer junk, you see loads of confidential information that needs to be securely disposed of and decent equipment that should be recycled and not just dumped in a landfill.

We also understand the sinking feeling you get when you think about dealing with all that, knowing the risk of mishandling confidential information and the increasingly stringent regulations and stiff fines for tossing old electronics in the nearest dumpster. Fortunately, your e-waste problem is a lot easier to deal with than you think. You can dispose of your unwanted hardware in a secure, cost-effective, environmentally friendly way with Iron Mountain.

Your e-waste problem has a secure and environmentally friendly solution: Office Electronics Recycling Box.

HERE'S HOW IT WORKS:

Step 1

Go [online](#) and place your order for the number of boxes you need. Our boxes are 48" x 40" x 36" and typically hold up to 800 pounds. Your boxes (and pallets) will arrive at your commercial location within 10 business days.

Step 2

Fill the boxes with all your unwanted laptops, desktops, printers, monitors, cables, cell phones, and other computer-related electronic equipment.

Step 3

Call us within 90 days of delivery for a pick-up. That's it. We'll then transport your boxes via Iron Mountain's purpose-built fleet of locked, alarmed, and GPS-monitored vehicles to one of our certified processing facilities for final disposition.

Once the process is complete, you'll receive a Certificate of Recycling and Data Destruction that lists the make, model, and serial number of the assets we picked up, the date they were processed, and confirmation that all material was handled in accordance with applicable local, state, and federal regulations.

ACCEPTED ITEMS:

- > Desktops
 - > Notebooks
 - > Network Devices
 - > Telephones: Desk & Mobile
 - > Teleconference Systems
 - > Tablets
 - > Laptops
 - > Hard Drives: Normal & SSD
 - > Tapes
 - > Docking Stations
 - > Monitors: CRT, LCD, LED, etc.
- ...and more

ORDER YOUR BOX NOW

Iron Mountain's Office Electronics Recycling Box is low effort and high reward.

You're not the only one with a conspicuous stash of old electronic equipment. With over 41 million computers disposed of every year in the US and the average computer lifespan sitting at 3-5 years, e-waste is quickly stacking up for everyone.

That's why Iron Mountain's Office Electronics Recycling Box was created. We wanted to make it easy for people like yourself to address this growing issue, stop feeling unnecessarily intimidated by it, and know you're making the right decision for yourself, your company, and the environment.

Iron Mountain's Office Electronics Recycling Box empowers you to:

CROSS A BIG TASK OFF YOUR "TO-DO" LIST

You're busy and don't have time to do lots of searching and planning to securely, responsibly, and cost-effectively clear out your old equipment. You need to get the job done. We make it as easy as shopping online. In the same way you'd order office supplies, you can order the removal of your old equipment. There are no lengthy phone calls, extended time sitting on hold, talking to people, or managing calendars to set up an appointment.

PRIORITIZE DATA SECURITY

Data security is a top consideration and responsibility for anyone managing IT assets. For this reason, we ensure they're disposed of in the safest way possible. Iron Mountain is a highly respected brand, globally known for its decades of experience and fleet of thousands of secure trucks, purpose-built for this very task. Every driver is comprehensively trained to ensure that your equipment is managed safely and securely, with your data and equipment fully protected at every stage.

OPERATE SUSTAINABLY

E-waste is becoming a growing global concern. How computer hardware is built, maintained, and disposed of all matters a great deal to the health of the planet. It's important that you work with a vendor like Iron Mountain that supports environmental best practices, such as having a no-landfill policy and not exporting e-waste. Every way that we care for your old IT assets is rooted in our commitment to the health of our global environment.

SUPPORT AUDITS

Out of sight is not necessarily out of mind. If that were the case, all of your old equipment wouldn't be weighing on your mind as you try to make the best choice in how to dispose of it. We not only help you make the right choice, but we also give you an auditable paper trail by providing certificates of recycling and data destruction. This simple but often overlooked component is key to providing your business with the evidence it needs to demonstrate that you securely, responsibly, and successfully retired your IT assets.
