IRON CLOUD™
DATA PROTECTION

POWERED BY CARBONITE

SOLUTION BRIEF

IRON CLOUD DATA PROTECTION, POWERED BY CARBONITE

IRON MOUNTAIN AND CARBONITE HAVE JOINED FORCES TO PROVIDE EXPANDED DATA PROTECTION SOLUTIONS FOR BUSINESSES OF ALL SIZES. IRON CLOUD POWERED BY CARBONITE HELPS YOUR IT ORGANIZATION LEVERAGE TURNKEY SOLUTIONS TO DEPLOY THE RIGHT FORM OF PROTECTION FOR VARIOUS DATA TYPES IN A SIMPLE COST STRUCTURE.

The Iron Cloud Data Protection Platform, Powered by Carbonite offers turnkey solutions to help you modernize your backup environment with easy on-boarding, best-in-breed solutions and dedicated technical support. Iron Mountain can also offer services for tape-to-cloud modernization to enable hybrid backup for servers and computers.

IRON CLOUD DATA PROTECTION, POWERED BY CARBONITE

Iron Cloud Server

All businesses need a straightforward, complete backup and recovery solution that keeps data secure, minimizes downtime and protects company operations. Iron Cloud Server is simple, all-in-one server protection for physical, virtual and legacy systems. Deployed onsite, the solution stores copies on a local target, in the cloud or to a secondary location. With optional onsite hardware and cloud failover, you can hit your RTO targets and gain greater confidence in your data protection strategy. The software and cloud service are fully integrated and backed by the award-winning Iron Mountain® and Carbonite support team.

Iron Cloud Endpoint

With so much valuable data on laptops and other devices, businesses leaders today require a reliable, secure and trusted partner to help them ensure data is protected across an increasingly mobile workforce with widely distributed data. Iron Cloud Endpoint provides advanced protection for desktops, laptops, tablets and smartphones. QuickCache and global deduplication help manage bandwidth consumption, and all of your backups are centrally stored and managed. Global location tracking, remote lock and remote wipe keep company data out of the wrong hands.

Iron Cloud Migrate

Iron Cloud Migrate quickly and easily migrates physical, virtual and cloud workloads with minimal risk and near-zero downtime. The simple, automated solution allows you to avoid lock-in to a specific hypervisor, cloud vendor or piece of hardware. The streamlined process automates and consolidates numerous steps into just a few simple tasks, reducing the amount of work you need to do to reach your migration goals. Once the replication is complete, you can test your target environment before cutover without impacting your production workloads or your users.

Iron Cloud Recover

Iron Cloud Recover is a disaster recovery as a service offering that securely replicates critical systems from a primary environment to the Carbonite cloud. This ensures that an up-to-date secondary copy is available for failover at any moment, minimizing downtime as well as costs. You pay for what you use, when you use it, not for idle resources.

Iron Cloud Availability

Iron Cloud Availability enables IT organizations to maintain the highest availability of their Windows and Linux servers by using continuous replication that maintains a secondary copy without taxing the primary system or network bandwidth. With support for physical, virtual or cloud source systems or target environments, Iron Cloud Availability is a comprehensive option for organizations with mixed IT environments.

IRON CLOUD™ DATA PROTECTION

POWERED BY **CARBONITE**

WHY IRON MOUNTAIN + CARBONITE?

Iron Mountain's delivers on decades of proven experience preserving valuable customer data, including for 95% of the Fortune 1000.
